

SOL 3.0

Autumn Sale

SOL (Storm Open Library) is a 181-font package aimed at creative studios and small publishers.

The initial version was released in 2005 as Stormtype's first OpenType collection. Since then all fonts have been significantly improved and extended by useful OTF functions. Cyrillics and Greek are now included in most families.

[illegible]

A large, elegant cursive flourish or calligraphic element, possibly a stylized letter 'S' or a decorative swirl, rendered in a dark gray color. The flourish features a large, open loop on the left side, followed by a series of sweeping, overlapping curves that extend towards the right. The lines are smooth and fluid, characteristic of a high-quality calligraphic script. The overall shape is elongated and dynamic, with a sense of movement and grace.
